# Meet Our Team

We are a team joined together by our **passion for mathematics**. With our deep background in mathematics and statistics, we are a detail-driven and methodical consulting group.

**LEILA ANICIA CORRALES**  
DIRECTOR OF BUSINESS AND  
LOGISTICS

**GERARDO GUTIERREZ**  
SENIOR ANALYST

**ARTURO MOLINAR**  
BUSINESS ANALYST

**FAYRE-ELLA OOI**  
BUSINESS INTELLIGENCE ANALYST

# Problem Statement

## 1. Data Fragmentation

- Lack of Data
- Insufficient Data Acquisition

## 2. Customer Retention & Growth

- Low Engaging Customers

# Our Goals

1. **Explore GES's Current Demographics and Markets** to understand their current business standings.
2. **Implement Machine Learning** to help in analysis.
3. **Suggest Marketing Strategies** to improve future data collection and customer satisfaction.
4. **Suggest Data Integration Strategies** to address GES's fragmented data issue.

# Agenda

Consult GES on:

- Key Findings
- Customer Behavior and Segmentation
- Sales and Products
- Marketing Strategies
- Data Integration
- Risks and Future Planning

**"Life moves pretty fast. If you don't stop and look around... you could miss it."**

**Ferris Bueller's Day Off**  
**(1986)**

# Data Cleaning:

## *Addressing Data Concerns and Stating Assumptions*

### Data Concerns

- Missing Data and Data Fragmentation

### We conducted data cleaning by:

- Feature Engineering
  - Binning
  - Grouping NA → unknown

### Assumptions

- Use Customer Profiles Demographics over Customer Transactions Demographics

# SWOT Analysis + Executive Summary

**01**

## **Strengths**

1. Multiple Revenue Streams
2. Global Reach
3. Customer Retention

**02**

## **Weaknesses**

1. Third-Party Data Reliance
2. Brand Awareness
3. Marketing Initiatives

**03**

## **Opportunities**

1. Data Integration
2. Customer Behavior Analytics
3. Loyalty Conversion
4. Vendor Partnerships

**04**

## **Threats**

1. Competitive Pressure
2. Missed Sales Opportunities
3. Privacy Regulations

# Quarterly Revenue Forecast

Simple model created using [Forecasting](#) on **Tableau**.  
Model Summary:

**RMSE: \$1,516**

- Our forecast is off by around \$1,516.

**\$52.3k**

Forecasted Revenue for the  
First Quarter of 2025

**7.4%**

Our forecast is within 7.4%  
of actual revenue

# Customer Behavior

Table : Multiple vs. Single Transactions

| Feature                | Multiple Transactions<br>(n = 314) | Single Transaction<br>(n = 49) |
|------------------------|------------------------------------|--------------------------------|
| Primary Touchpoints    | In-person + Products/Services      | Theatrical + Products          |
| Preferred Party        | 1st & 3rd                          | 3rd Only                       |
| Average Lifetime Value | \$662                              | \$41                           |

Table : Complete vs. Incomplete Profiles

| Feature              | Complete<br>(n = 248) | Incomplete<br>(n = 115) |
|----------------------|-----------------------|-------------------------|
| Primary Touchpoints  | Online + In-Person    | In-Person + Products    |
| Preferred Party      | 1st & 3rd             | 3rd Only                |
| Average LTV          | \$813                 | \$72                    |
| Average Transactions | 9                     | 2                       |

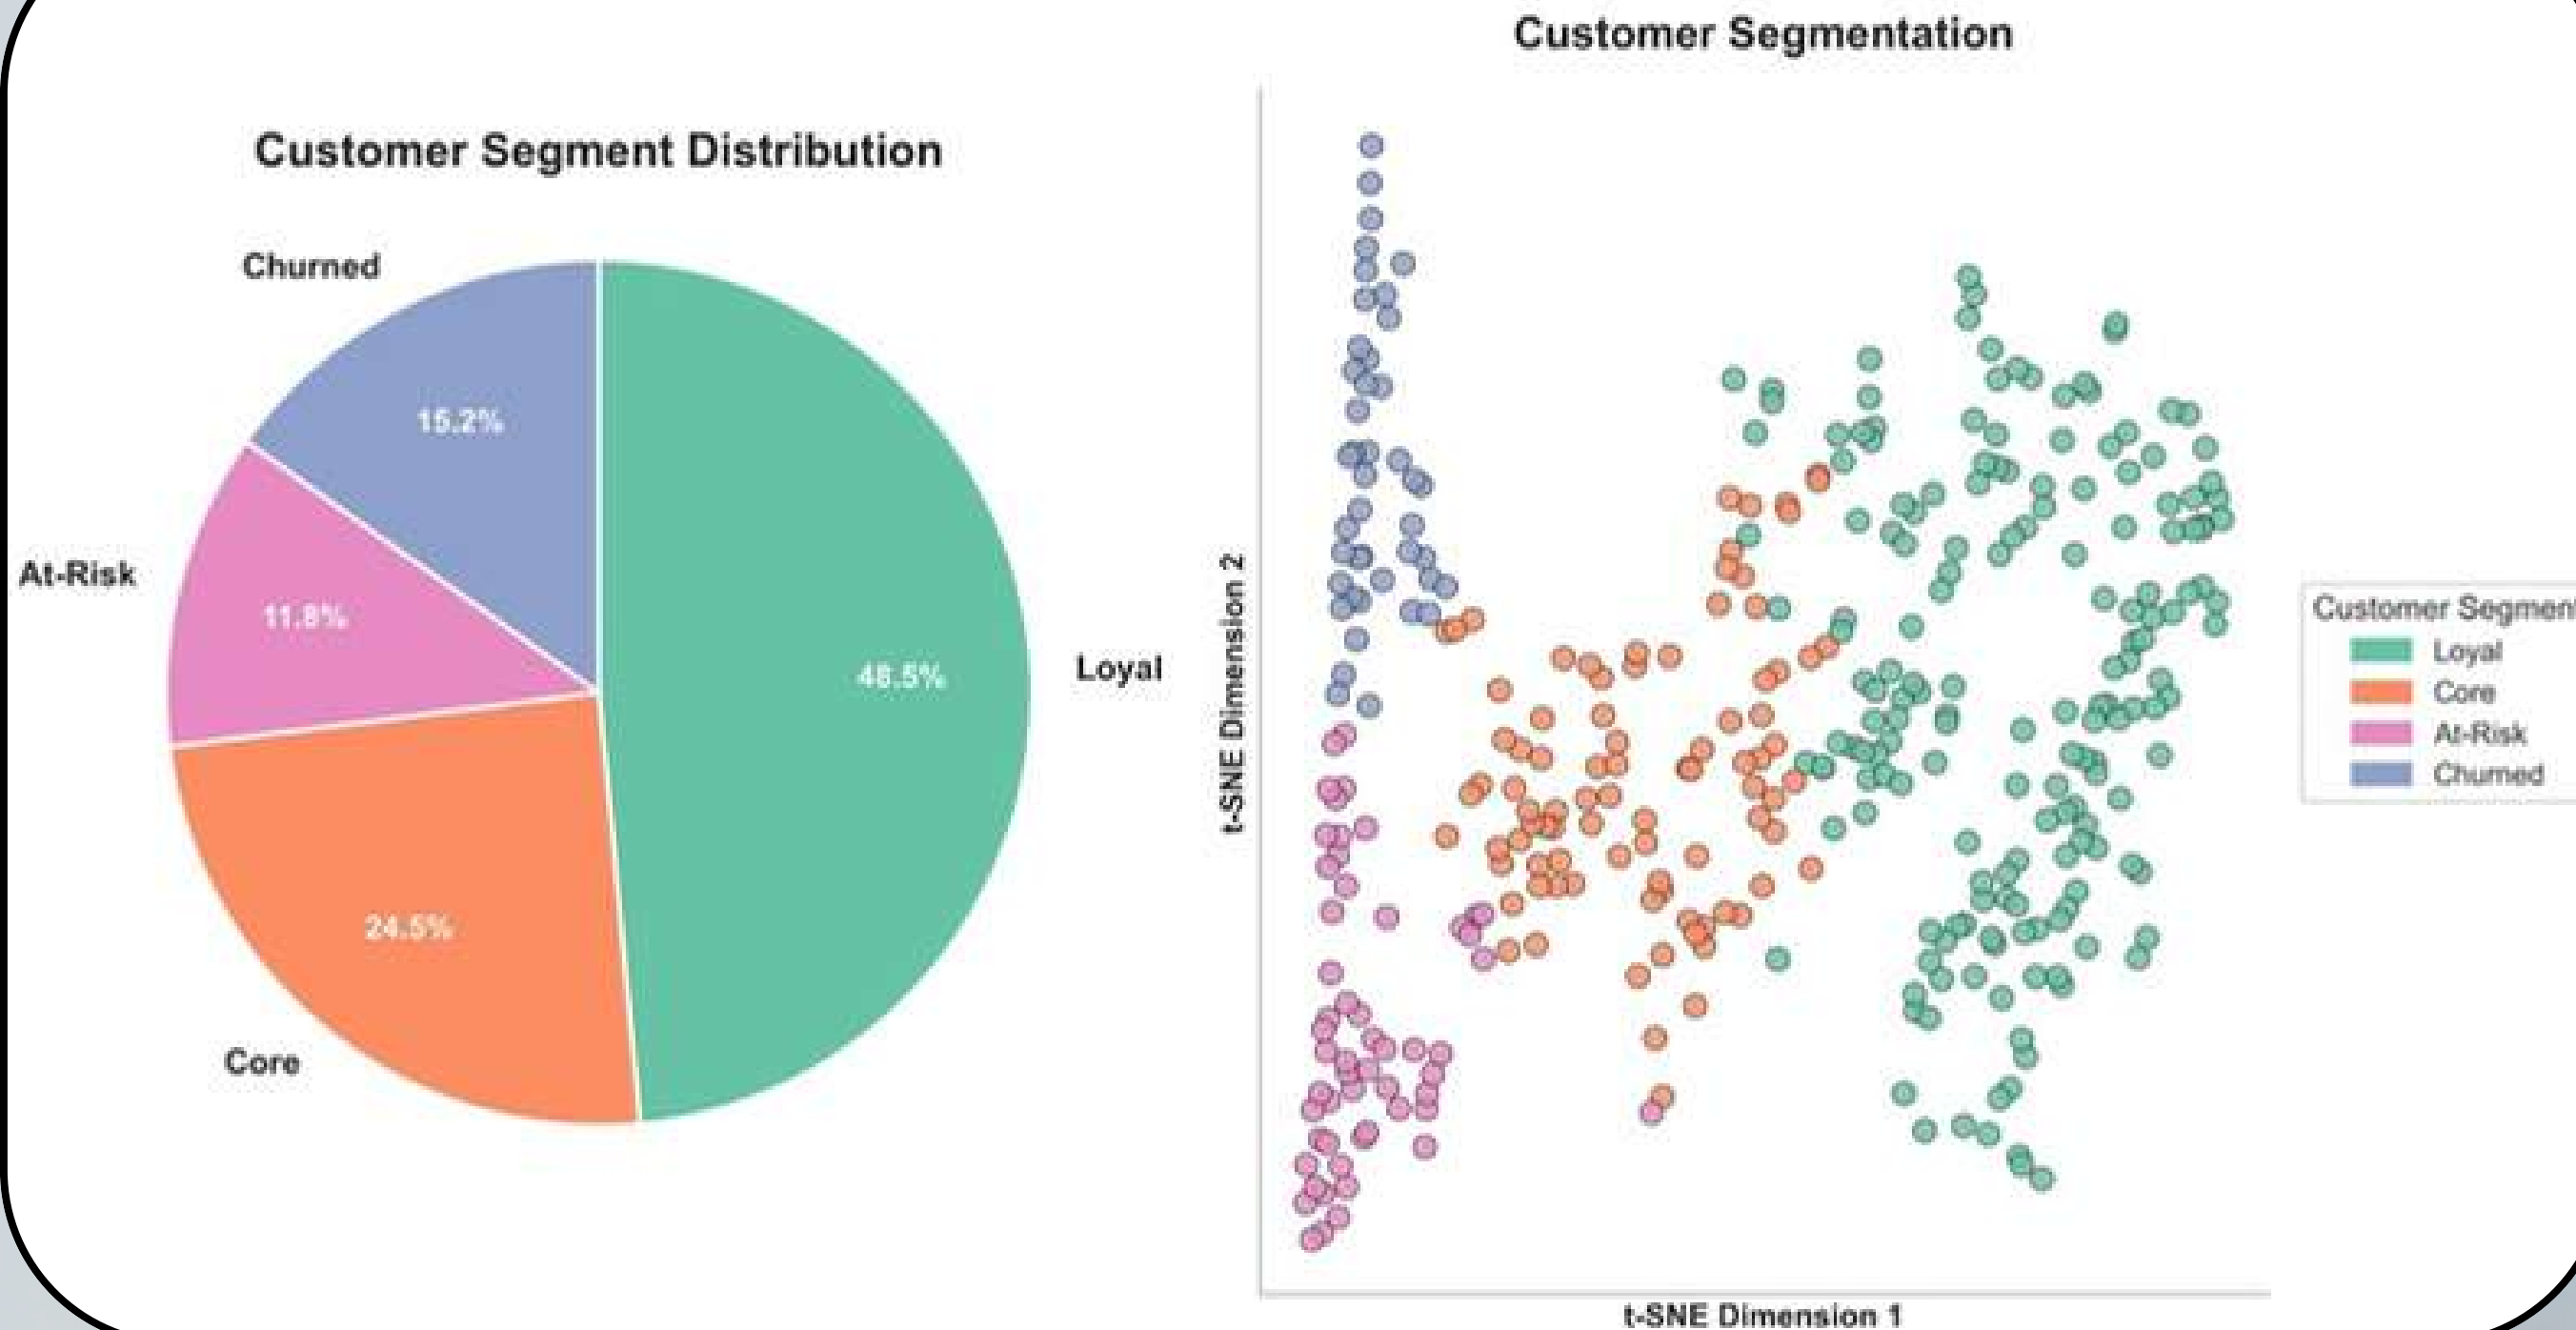

## Takeaways

- **Single Business Line Engagement**
  - Movie Screening or Consumer Products.
- **Customer Loyalty**
  - In-Person + Products + Streaming
- **Data Fragmentation from 3<sup>rd</sup> party transactions**
  - Data Privacy
  - Nature of Transactions

# Data Driven Customer Segmentation

## Customer Segmentation Overview

## Segmentation Summary

### **Loyal:** Fanbase Group

- All Touchpoints
- High Engagement

### **Core:** Online + Products

- Streaming rather than In-Person

### **Churned:** Screenings + Products

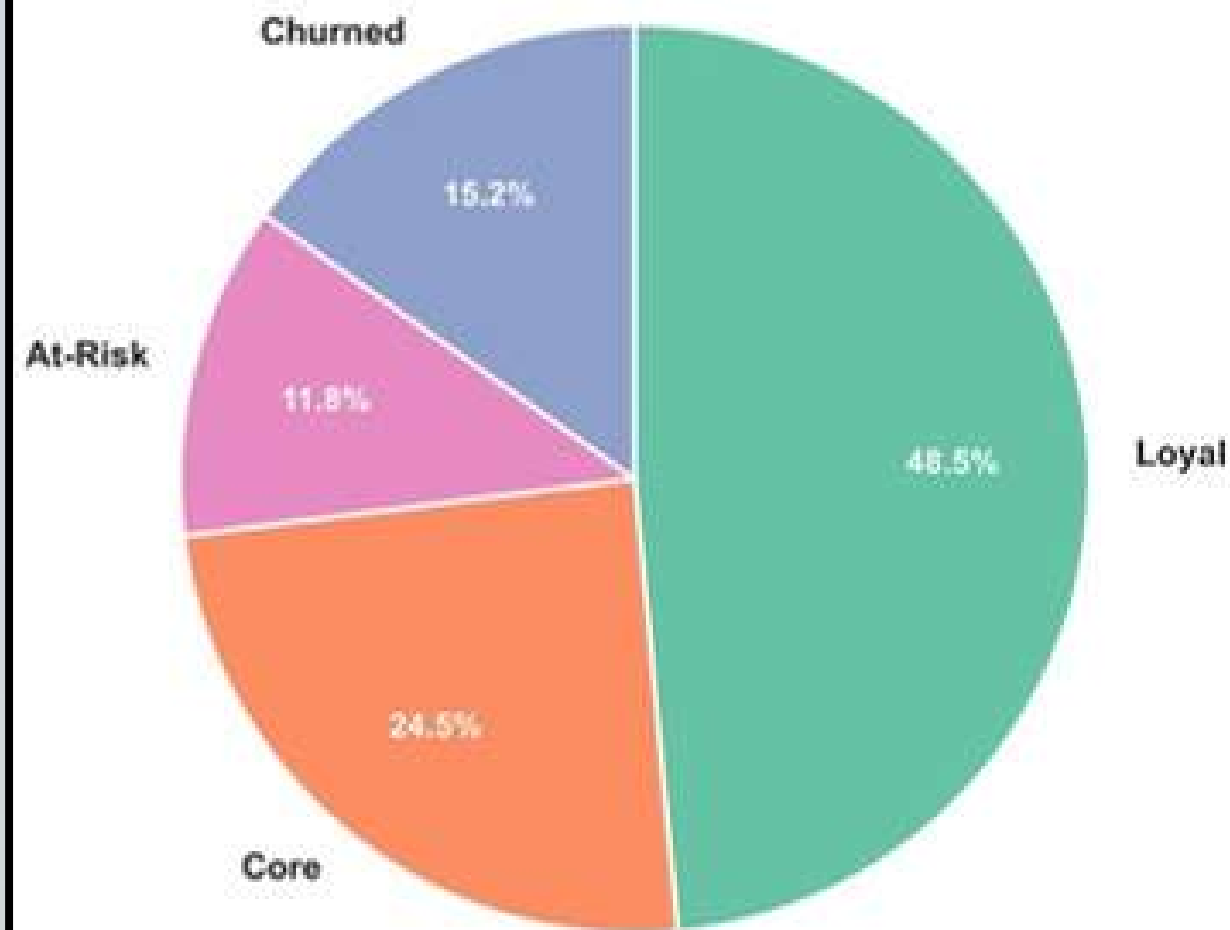

- Low Engagement

### **At-Risk:** Screenings + Products

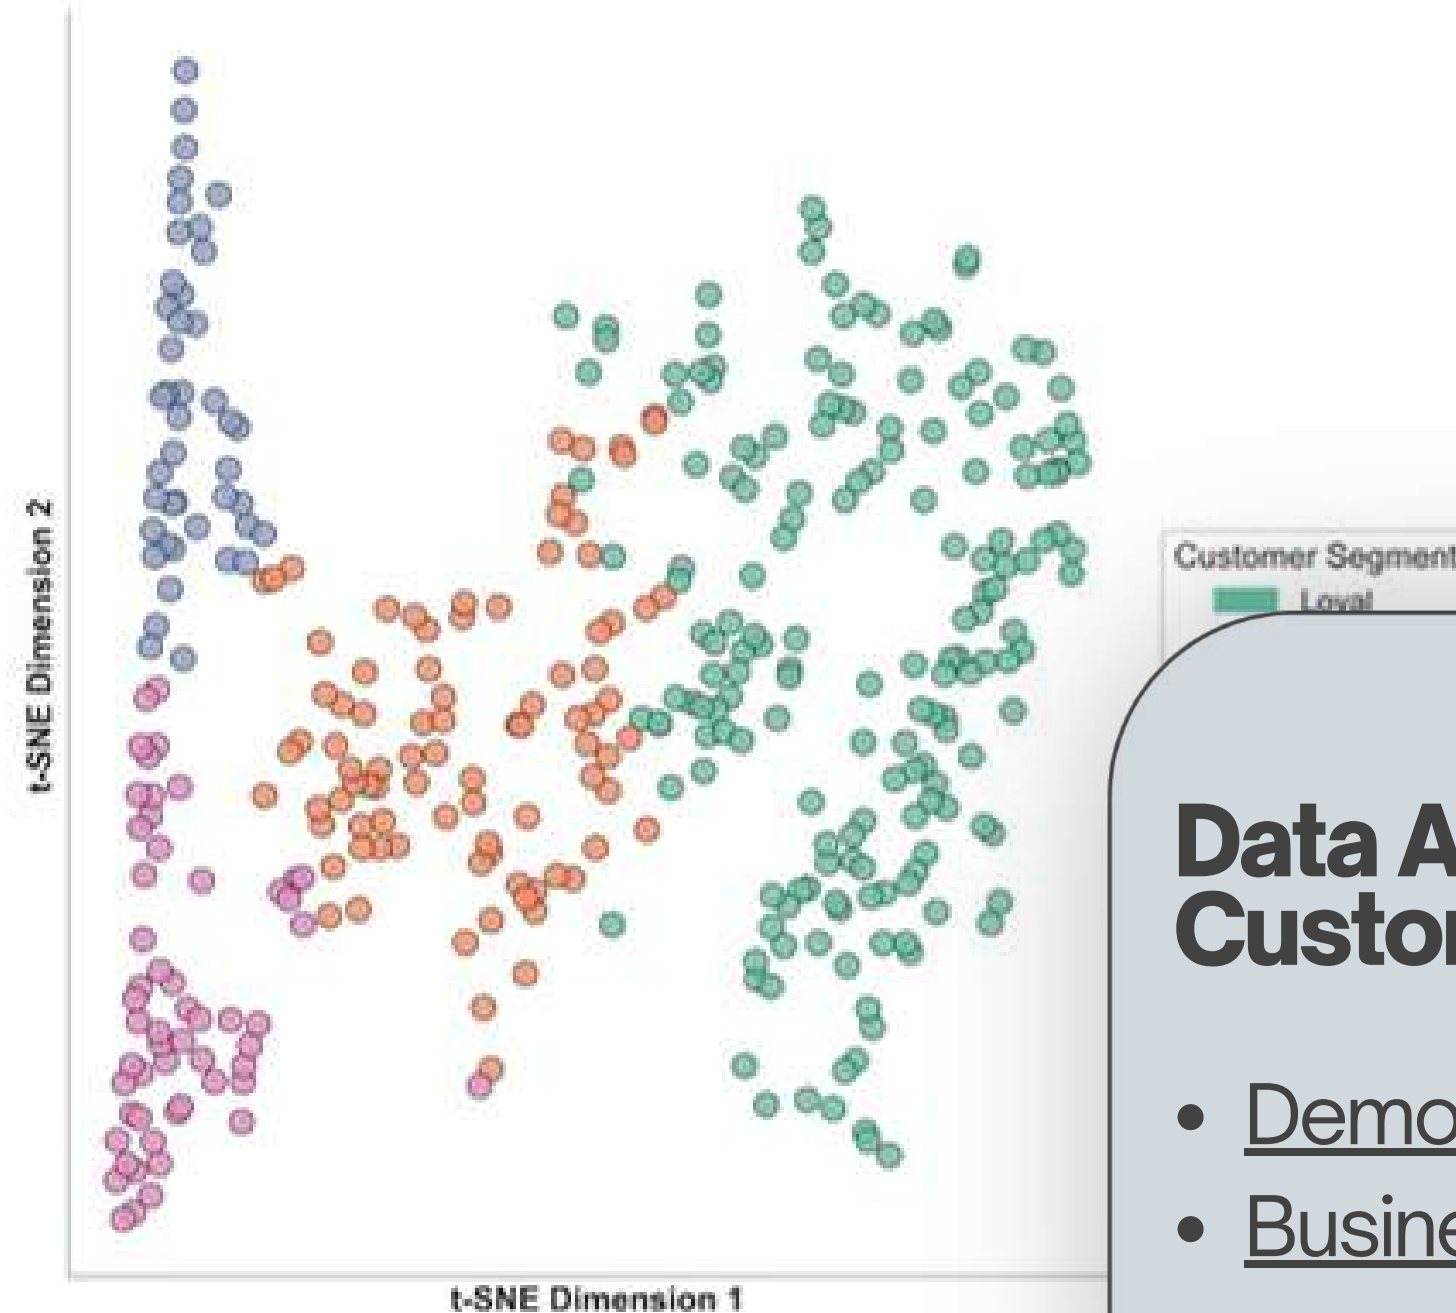

- High Conversion Potential

## Customer Segmentation Overview

# Sales Findings

Table : Customer Breakdown by Quarter

| Customers        | Q1  | Q2  | Q3  | Q4  |
|------------------|-----|-----|-----|-----|
| Total            | 273 | 252 | 259 | 279 |
| New              | —   | 44  | 26  | 20  |
| Rolling Total    | 273 | 317 | 343 | 363 |
| Retained         | —   | 66% | 68% | 71% |
| Unique Customers | —   | 80% | 76% | 77% |

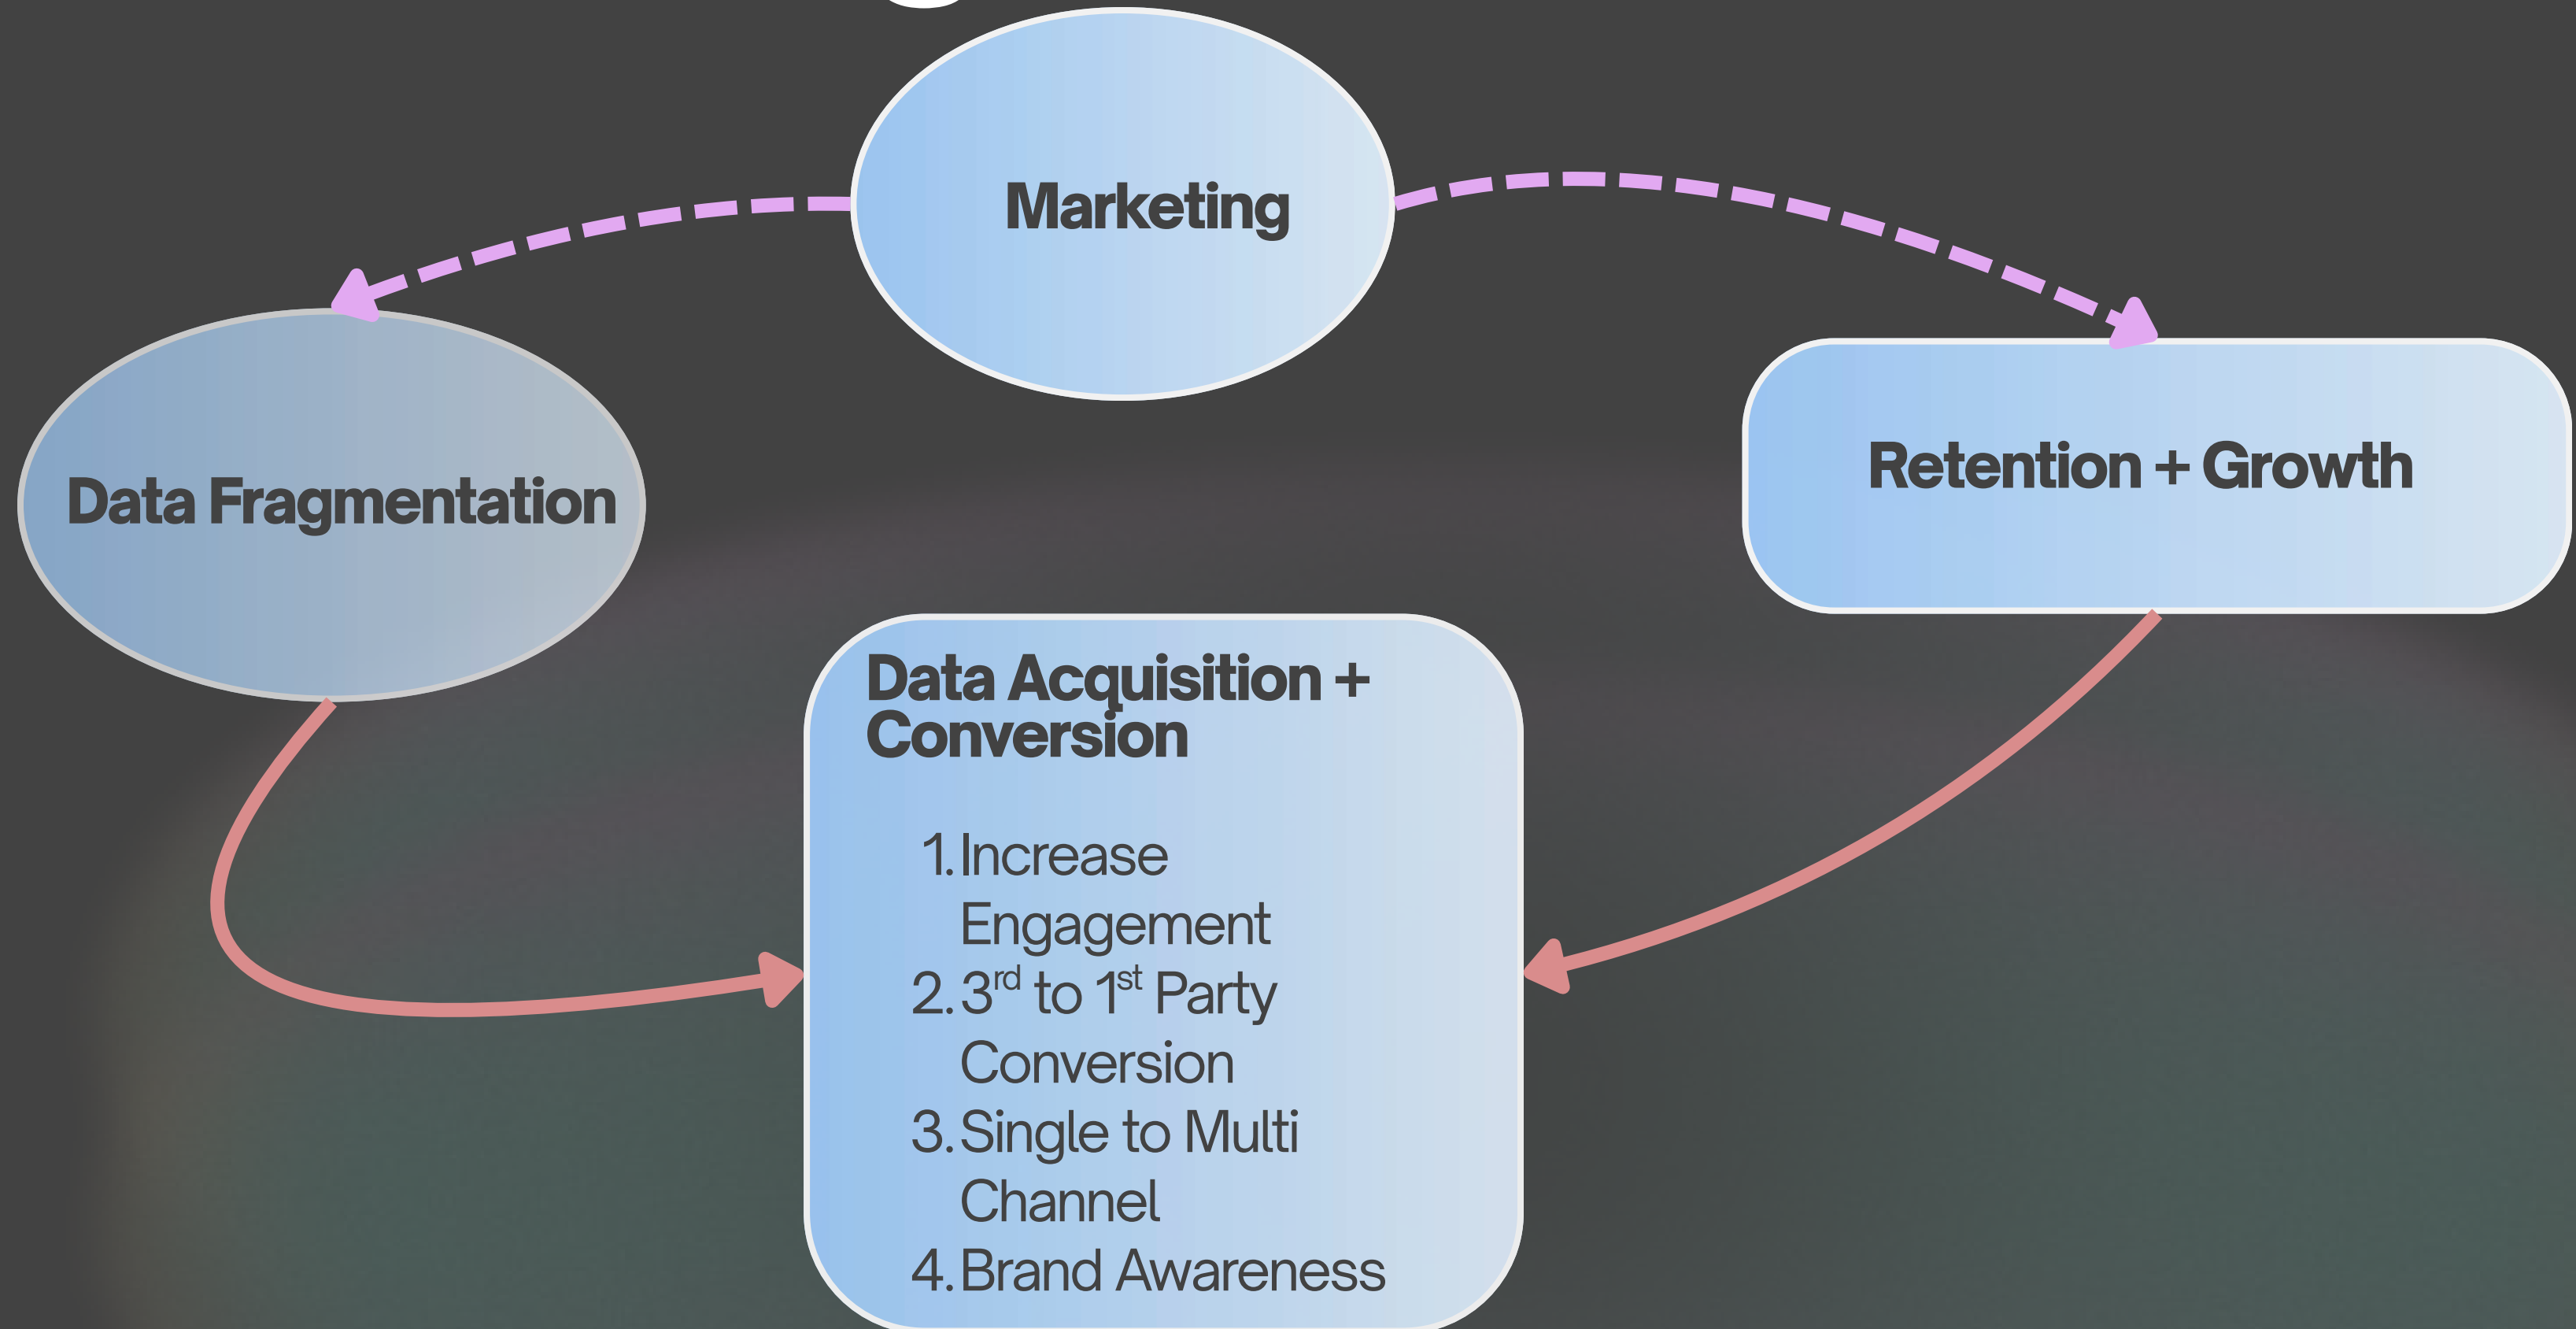

## Findings

- Q2 sales decline
  - Less Studio Tours
    - 47% Total Revenue
  - Streaming Decrease
- Customer Outreach
  - New Customer Decline
- Increase in Retention

## Areas of Focus

- Studio Tours Sales
- Popular Consumer Products
- Streaming Retention
- Demographic Engagement

# 🌀 Marketing Flow

# Data Fragmentation

*Key Conversion: 3<sup>rd</sup> Party → 1<sup>st</sup> Party*

## Brand Awareness

1. Attract New Customers
  - a. Referrals
    - i. Streaming + Online  
+ Studio Tours

## Third-Party Partnerships

1. Data-Sharing Agreements
  - a. Website Analytics
2. QR Codes/Ads around  
checkouts

# Retention + Growth

*Key Conversion: In-Person + Products + Online + Studio Tours*

## Personalized Ads through Emails:

- Demographics
- Days of the week
- Recency Thresholds
- Product Recommendations

## Rewards

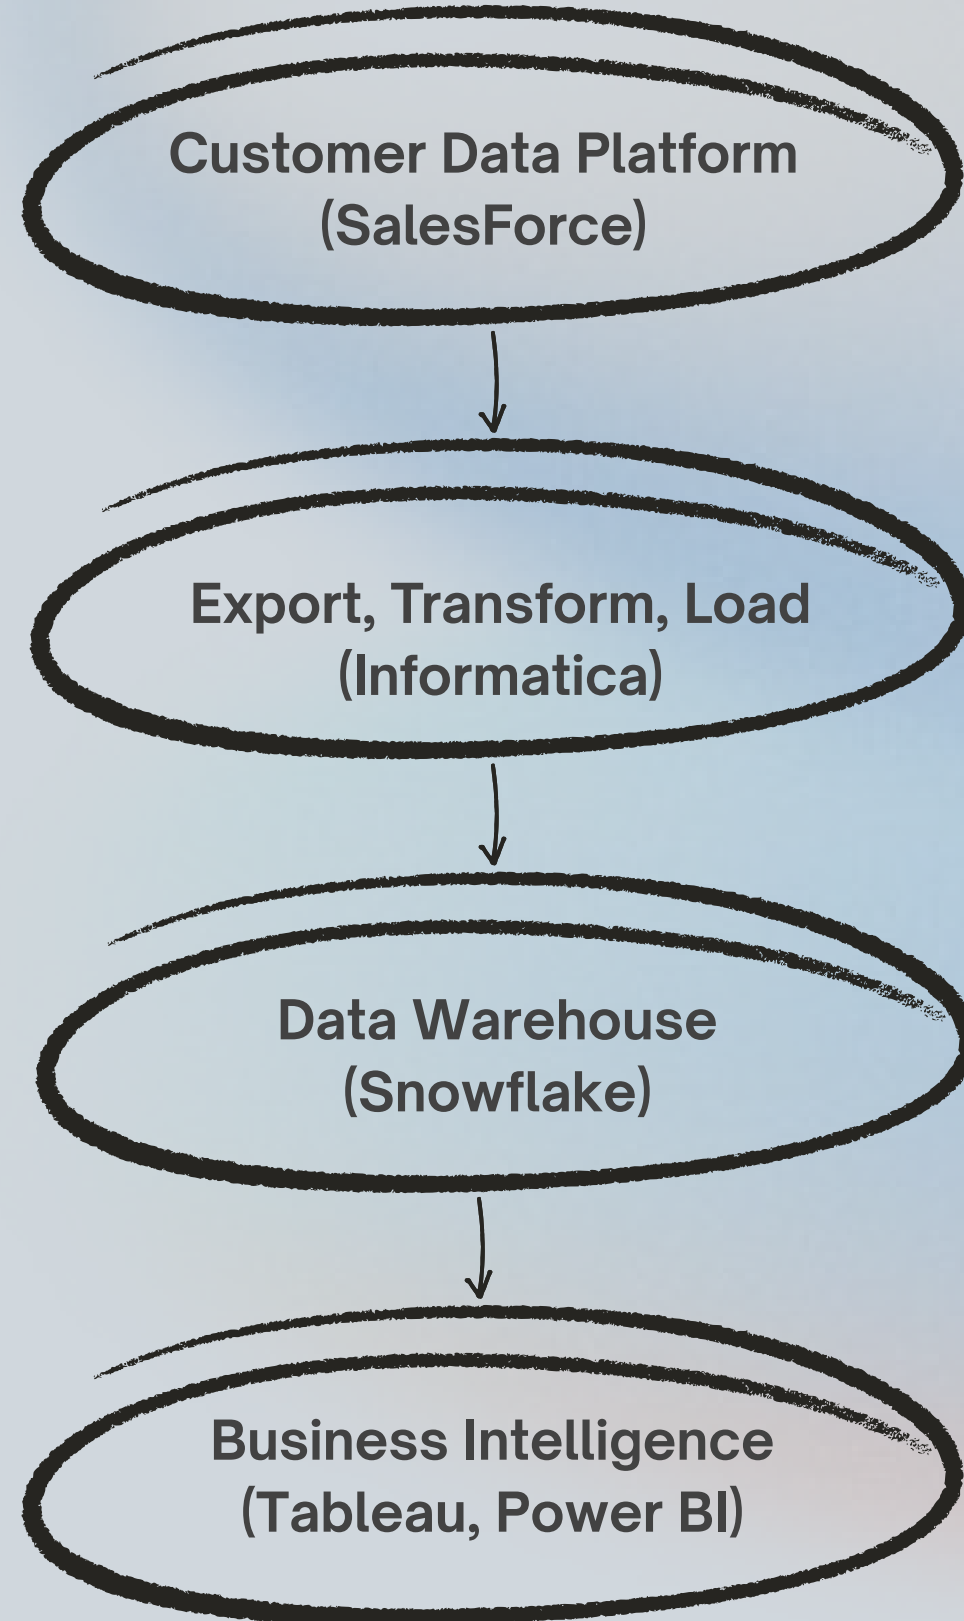

- Offer Early access & Premium Content
- Promotion on Studio Tours
- Product Bundles

## 1st Party Points of Contact

- Newsletters + Rewards Program
- Post-Purchase Prompts

# **Data Integration**

## **Data Unification**

## **Warehouse Infrastructure**

### **Marketing Fact Table**

- Customer Behavior + Demographics
- Potential Opportunities
- Lifetime Value Measures
- Retention + Outreach Initiatives
- Data Completeness Monitoring

### **Sales Fact Table**

- Revenue and Product Measures
- Product Performance
- Vendors and Business Lines
- Regional Breakdown

# Implementation Roadmap

**Present, 2024**

**Month 1-3**

**Month 4-9**

**Month 10-13**

**MARKETING**

**Conversion Initiatives**

**Expanding Vendor Partnerships**

**Assessment of Initiatives**

**DATA INTEGRATION**

**Identify Business  
Requirements**

**Salesforce Set  
Up and Training**

**Snowflake Data  
Warehouse Set Up**

**Business  
Intelligence**

**ETL Maintenance**

# Forecasted Effectiveness of Initiatives

## Sales Goals and Measures

Table : Sales Measures and Goals

| Measures and Goals         | Q1       | Q2       | Q3       | Q4       |
|----------------------------|----------|----------|----------|----------|
| Customer Retention         | 72%      | 75%      | 78%      | 80%      |
| Total Transactions         | 670      | 621      | 643      | 684      |
| Revenue                    | \$57,405 | \$52,160 | \$57,188 | \$58,832 |
| Expand Multi-Channel Usage | 80%      | 82%      | 84%      | 85%      |
| Enhance Data Completeness  | 68%      | 71%      | 75%      | 80%      |

225K

Projected Revenue of 2025

*Improved Brand Awareness*  
*Improved Data Completeness*

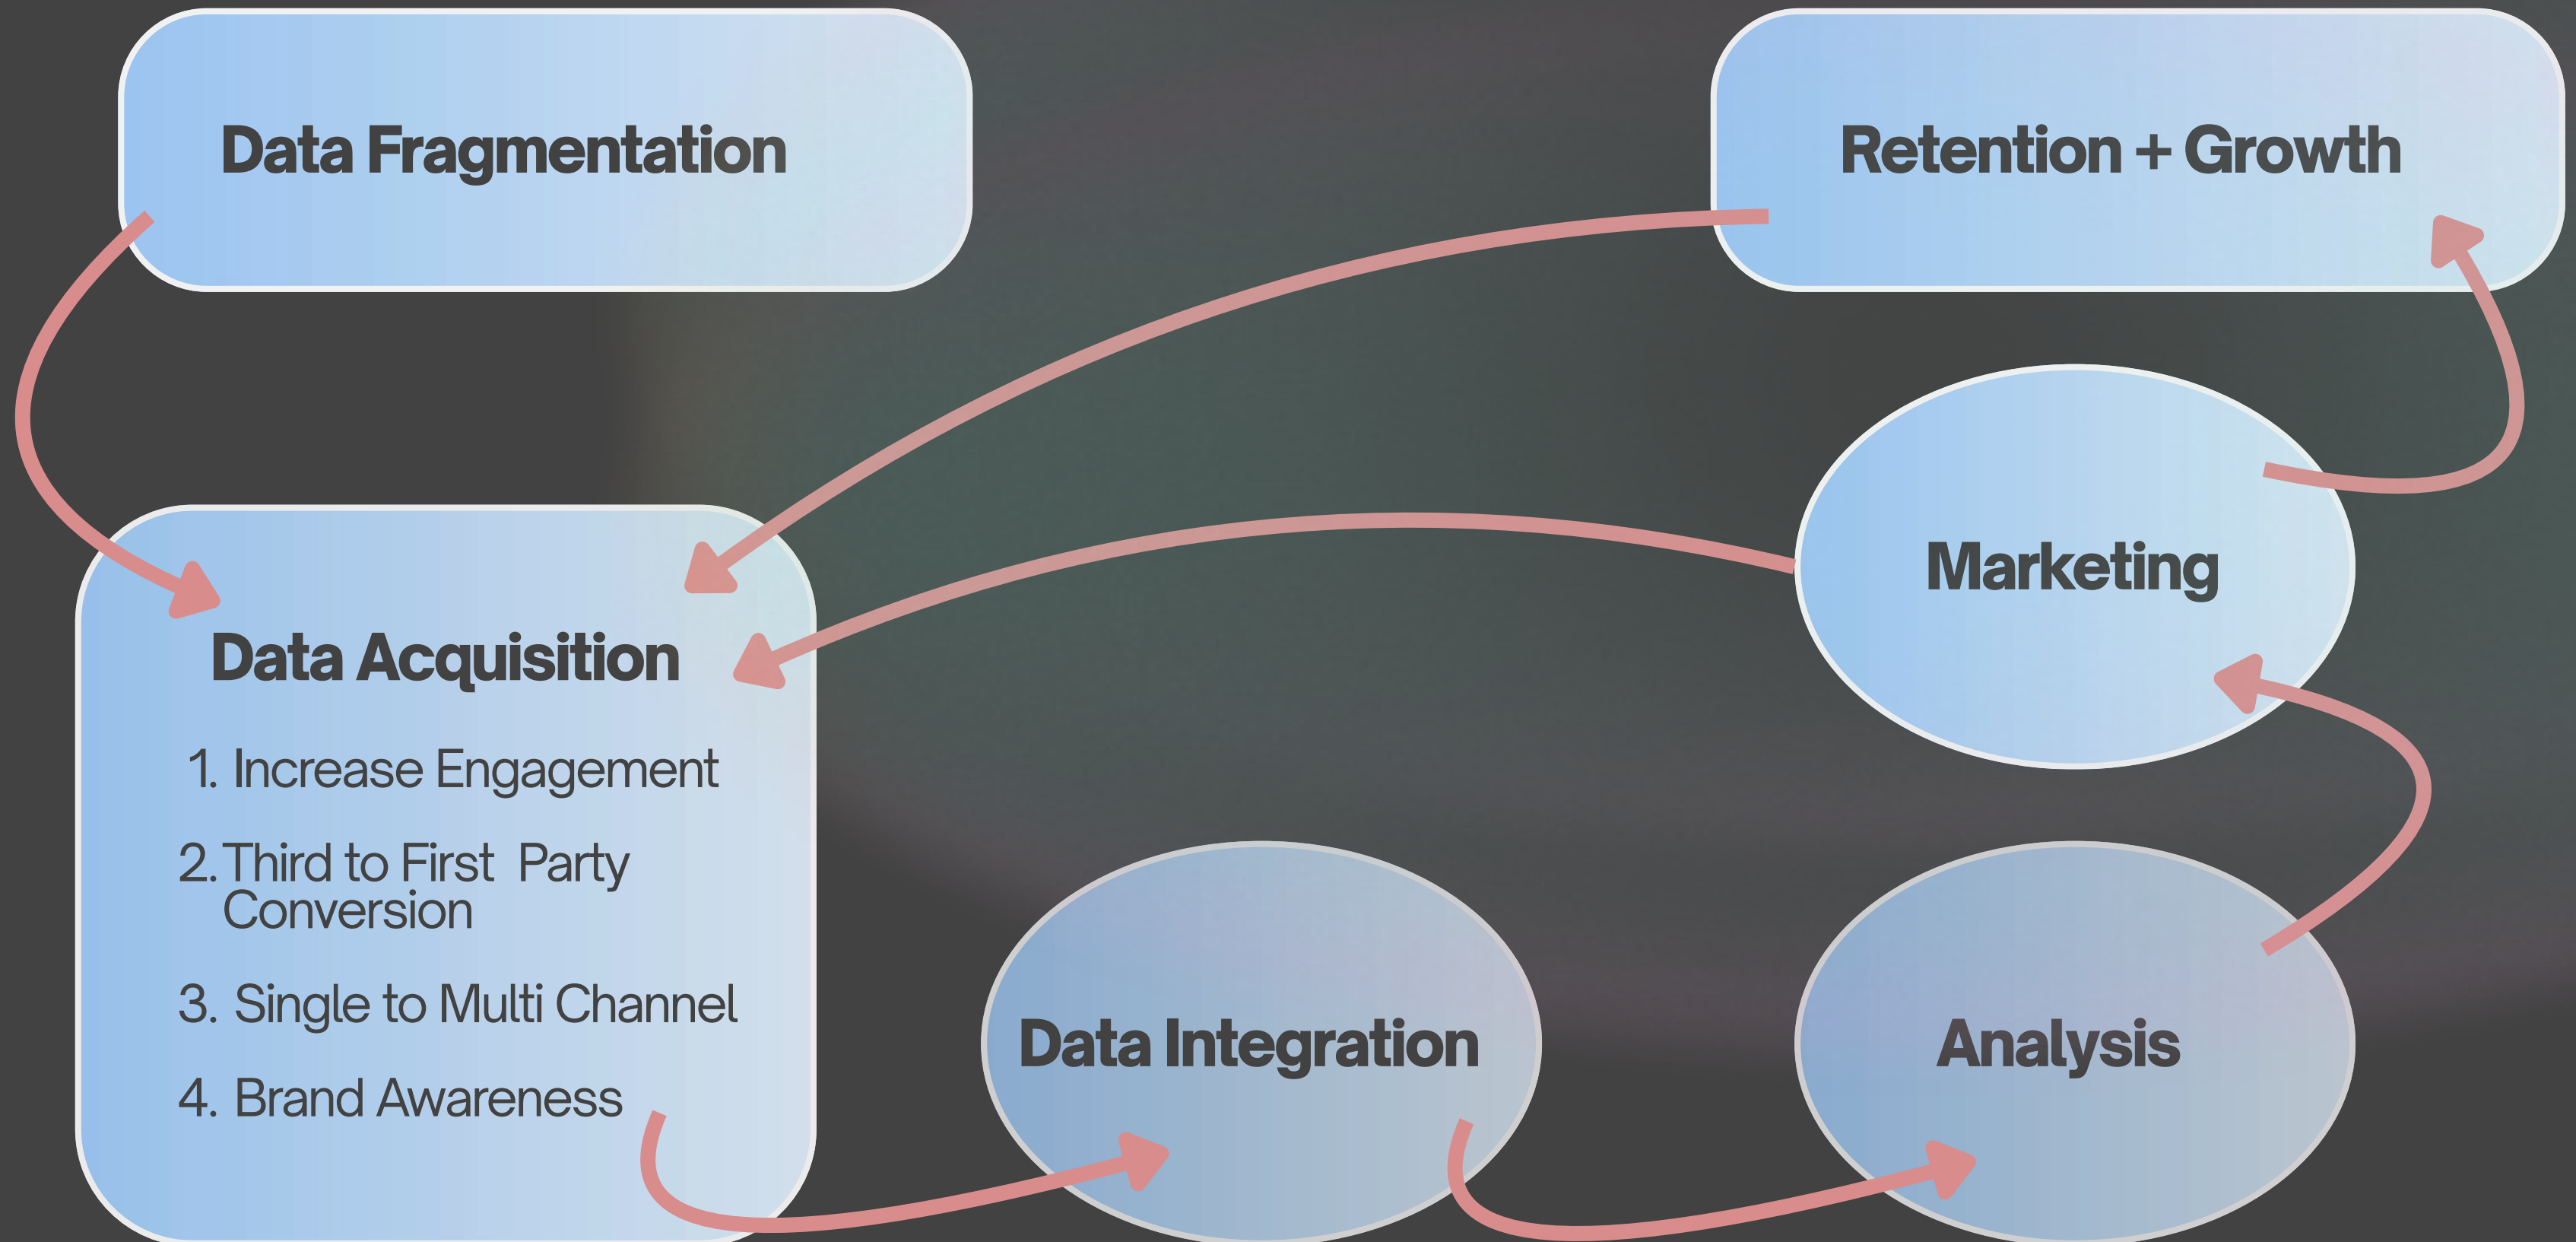

7%

Growth in Sales for the  
year

# Risk Assessment

| Strategy                     | Risk                               | Why it's a problem                        | Impact | Mitigation                           |
|------------------------------|------------------------------------|-------------------------------------------|--------|--------------------------------------|
| Encouraging Repeat Purchases | Over-targeting Customers           | Can be annoying                           | High   | Limit Frequency                      |
|                              | Increased Marketing Cost           | Ads may not convert                       | Medium | Track ROI                            |
|                              | Customers wait for discounts       | Trains customers to not buy at full price | High   | Use limited-time offers              |
|                              | Ineffective bundling or promotions | May not influence purchase behaviour      | Low    | Regularly update segmentation model  |
|                              |                                    |                                           |        |                                      |
| Customer Segmentation        | Misclassification of customers     | Wrong segments = wrong strategy           | High   | Regularly update models              |
| Data Integration             | Data Privacy Issues                | Using data improperly                     | Medium | Ensure Compliance (CIAM, GDPR, etc.) |
|                              | Over Complex System                | Hard to manage                            | Low    | Keep segmentation actionable         |
